Bring & buy

Most churches tend to ignore the legal requirements for compliance with health & safety legislation – until it is too late!

You know you need to get compliant, you need to do the risk assessments, you need the policies and procedures in place – but YOU are too busy and you do not have the time to ensure it is done.

We understand. You have to run your organisation. You know how your organisation operates. You do not have the time to search the legislative websites to keep up to date.

We do that for you!

We become your backroom health & safety department.

We will ensure all the necessary policies and procedures are produced and **tailored** to your church requirements.

We will give the **‘hands-on’** assistance required to complete the audits and risk assessments – In effect we take the pressure and headache out of compliance.

Read the enclosed leaflets and contact us for an informal chat – **much better than taking a Headache tablet.**
