

Church SAFETY

Fire Risk Assessment

© 2006 ChurchSafety

Name and address of Place of Worship	
Name of person who did the assessment	
Date of assessment	Review date (usually after one year)

1. List the fire hazards including ignition sources, fuel sources and oxygen sources. Make a note of when these hazards are close together.	2. List the people who are at risk from fire or smoke. Consider where people would be in case of fire and who is specifically at risk.	3. Evaluate the risk of fire. Decide what is being done / can be done to reduce or remove the risk. Decide on a time scale, where appropriate.
